## KOC Celebrates Commencement of Production at Mutriba Field

Which joins Kuwait's producing fields to help meet local and global market needs

Under the patronage and in the presence of His Excellency the Minister of Oil, Tariq Sulaiman Al-Roumi, KOC celebrated the commencement of production at the Mutriba oil field in North West Kuwait.

This special ceremony was held in the KOC Tent in Ahmadi and was attended by several senior officials in the oil sector, including KPC CEO Sheikh Nawaf Saud Nasser Al-Sabah, KOC CEO Ahmad Jaber Al-Eidan, KNPC CEO Wadha Al-Khateeb, Ag CEO of Kuwait Oil Tanker Sheikh Khaled Al-Sabah, CEO of Kuwait Foreign Petroleum Exploration Company "KUFPEC" Eisa Al-Maraghi, and Ag. KOGC CEO Bader Al-Munaifi. Also in attendance was Olivier Le Peuch, CEO of SLB (formerly Schlumberger), one of the key companies involved in the project.

The ceremony featured a speech by KOC CEO Ahmad Jaber Al-Eidan, who acknowledged the numerous challenges encountered during the field's development and highlighted the Company's success in effectively addressing and overcoming them. He pointed out that KOC worked diligently

to accelerate the operation of the field so it could join Kuwait's currently producing fields and help meet both local and global market demands, especially since the field produces light crude oil, which is highly sought after in international markets.

Following the speech, a video presentation provided historical context about the field and showcased its current status with the commencement of production. This was followed by remarks from DCEO Exploration & Drilling Khaled Al-Mulla, who spoke about the significance of this achievement.

The ceremony concluded with the presentation of commemorative gifts to Minister Al-Roumi, the CEO of KPC, and the CEO of SLB.

It is worth noting that commercial production at Mutriba Field officially began on June 15, 2025, after the successful connection of several wells to the Company's production facilities. The field is located in an undeveloped area lacking infrastructure in northwest Kuwait and spans more than 230 square kilometers.

## KOC Participates in MEOS GEO 2025

Represented by a high-level delegation led by the CEO, including DCEOS

KOC participated in the Middle East Oil, Gas & Geosciences show (MEOS GEO) 2025, which was hosted by the Kingdom of Bahrain over a period of three days.

The Company was represented at this prominent event, held under the theme "Energy for a prosperous future: leading a sustainable tomorrow", by a high-level delegation led by CEO Ahmad Jaber Al-Eidan. The delegation also included DCEO Exploration & Drilling Khaled Al-Mulla, DCEO S&EK Fuad Al-Shaikh, along with several Group Managers, Team Leaders, and other officials.

This major regional energy event was held under the patronage of Bahrain's Crown Prince, His Royal Highness Prince Salman bin Hamad Al Khalifa. It saw the participation of top executives from leading regional and international companies and organizations, who discussed vari-

ous issues related to the oil and gas sector, sharing the latest experiences, best practices, and applications.

During the conference sessions and accompanying exhibition, KOC had the opportunity to explore the latest technological innovations and advanced engineering solutions. This included applications of artificial intelligence, digital geological analysis technologies, reservoir monitoring systems, and enhanced oil recovery methods. The Company also showcased its expertise, capabilities, and practices, highlighting the progress it has made and the technologies it has developed, both in-house and through collaboration with leading global companies.

More than 120 local, regional, and international companies participated in the exhibition, representing a distinguished group of key players in the oil, gas, and renewable energy sectors.

## KOGS Steering Committee holds its Fourth Meeting

Final preparations and procedures for hosting the event in February 2026 were discussed

The Steering Committee for the fifth edition of the Kuwait Oil & Gas Show and Conference (KOGS 2026) held its fourth coordination meeting as part of the ongoing preparations for the event, which will be hosted by KOC in February 2026.

The meeting was chaired by KOC CEO Ahmad Jaber Al-Eidan, and attended by senior executives from oil sector companies, global partners, and academics from various universities and institutes. Also present were representatives of the Society of Petroleum Engineers (SPE), which is organizing this prominent event.

The meeting covered organizational and logistical aspects of the conference and reviewed scientific themes, media and marketing

plans, as well as collaboration mechanisms with partners, with the aim of ensuring strong regional and international participation in the four-day event, scheduled to take place from February 2 to 5, 2026.

The conference and accompanying exhibition, hosted by KOC, are among the region's most prominent events in the oil and gas sector. By combining a technical conference and an exhibition, the event attracts top industry leaders and experts to discuss the latest developments and innovations in energy, sustainability, modern technologies, and digital transformation in the upstream sector.

## Launch of LSTK Project for Five Development Drilling Rigs

As part of the strategy to enhance drilling, boost efficiency, and leverage expertise

Under the patronage and in the presence of Manager Drilling Group (S&EK) Bader Al-Azmi, a launch ceremony was held for a project based on a Lump-Sum Turnkey (LSTK) contract to provide five rigs for development drilling, in collaboration with the Chinese contractor Sinopec.

The ceremony took place at the project site in the Greater Burgan Field, attended by a representative of TL Drilling-III (S&EK), senior engineers from the Team, and a number of officials from the Group.

This project falls within KOC's strategy to enhance drilling operations, improve production efficiency, and leverage the expertise of specialized companies.

The Lump-Sum Turnkey (LSTK) contract system is considered a fixed-price agreement under which the contractor commits to delivering a complete and ready-to-use facility or project for a predetermined total amount, while taking responsibility for design, engineering, procurement, construction, and commissioning.

# NOV Downhole Tool Technologies Showcase Event

Covering technical challenges, drilling efficiency, and production goals

Under the patronage and in the presence of Manager Drilling Group (N&WK) Hadi Al-Ajmi, the Group, in cooperation with NOV Kuwait, hosted an event dedicated to showcasing downhole tool technologies.

The event was held at the Ahmad Al-Jaber Oil & Gas Exhibition and attended by several Team Leaders. It featured presentations on NOV's latest solutions for downhole operations, including drilling motor technologies, torsional vibration reduction tools, and friction reduction tools. Case studies were also presented, demonstrating tangible performance improvements.

This event provided engineers and specialists from various Drilling Groups within the North & West Kuwait Directorate with a valuable opportunity to engage directly with NOV's regional and international experts, discuss technical challenges, and explore ways to enhance drilling efficiency and support production goals.

It is worth noting that NOV is a leading American company in oil and gas services, products, and equipment. With a history spanning 150 years, the company was formerly known as National Oilwell Varco, and is currently headquartered in Houston, Texas.

## HSE N&WK Conducts Best Practices in Gas Testing Campaign

Enabling participants to interact with detection devices and understand operational challenges

The HSE Team (N&WK) conducted a campaign and workshop on Best Practices in Gas Testing, under the slogan "Know your Gas Detector".

The event, held at the North Kuwait Offices Complex, aimed to promote best practices in gas testing and was attended by a significant number of participants, including KOC employees from various Teams in the Directorate. This initiative featured hands-on demonstrations and technical sessions led by experts, aiming to enhance safety awareness and competence in gas detection and testing procedures.

In his opening remarks, TL HSE (N&WK) Ahmad Al-Shatti emphasized the importance of such initiatives in reinforcing a strong safety culture and operational integrity. He highlighted the critical role gas testing plays in preventing incidents and protecting lives in field operations.

The workshop was organized in collaboration with Dräger, a global

leader in safety equipment manufacturing, and led by the HSE N&WK Team including Senior Safety Engineers Sami Al-Enezi, Mohammed Al-Shammari, and Yousef Al-Khayyat, as well as Safety Engineers Jasem Al-Kandari and Ahmad Al-Failakawi

The campaign not only provided valuable technical insights, but also offered participants the opportunity to interact with real gas testing equipment, understand operational challenges, and explore best practices to ensure compliance with the HSSE Management System.

All attendees appreciated the workshop's interactive and practical approach, particularly the live demonstrations which contributed to solidifying technical concepts and raising practical awareness about gas testing and the proper methods for using detection devices safely and effectively.

## CSG Holds a Session on Updated Invoicing Procedures and Guidelines

Aiming to guide Teams in adopting field-specific best practices

Under the directives of Manager Abdulaziz Al-Obaidan, the Corporate Services Group organized a session titled "Updated Invoicing Procedures & Guidelines". The session was prepared and presented by the Corporate Services Support Team and was attended by a large number of employees from various Teams within the Group.

The session's program was overseen by TL CSS Talal Al-Mutairi, while

Senior Engineers Amirah Al-Shadoukhi and Kholoud Al-Omani presented the session's content, with direct support from Ag. TL Hamad Al-Essa.

The session aimed to guide the Group's Teams in adopting best practices for submitting contract invoices. It is part of the Group's ongoing efforts to enhance efficiency, accuracy, and compliance across all invoicing processes.

## 702 Gift Cards Issued to Honor Long-Serving KOC Employees

Carried out by the Financial Payments Team as part of an annual effort to recognize contributions

Under the directives of TL Faisal Al-Loughani, the Financial Payments Team, in collaboration with both the Public Relations and Personnel Admin Teams, issued 702 gift cards in honor of the Company's long-serving employees. The cards were issued through the National Bank of Kuwait.

This year's honoring categories included employees who have served for over 15, 20, 25, 30, and 35 years, as part of the Company's annual tradition to recognize and appreciate their dedication and efforts.

Al-Loughani expressed his gratitude and appreciation to all past and present employees who have contributed to the Company's success. He extended special thanks to the Personnel Admin Team for preparing the list of eligible recipients, as well as to the Public Relations Team for their active role in distributing the cards in collaboration with the National Bank of Kuwait.

## KOC Celebrates Commencement of Production at Mutriba Field
